

Momentum Upgrade November 2020 (5/11/2020)

Changes Specific to the Contact Assessment

Section C

Sometimes an assessment commences but is not going to be completed, because the person's needs have changed or no longer exist. The assessor ends the Contact Assessment at item C6. Now when they do this, it will be possible to mark the whole assessment complete without being required to enter any information in Sections D and E. The assessor can mark the assessment complete.

6	SUPPORT SERVICES MAY BE REQUIRED FOR THIS PERSON	<input checked="" type="radio"/> 0. No - Go to E10 <input type="radio"/> 1. Yes - Complete sections D and E
---	--	--

Once C6 is coded 'No' the software will prevent the assessor from completing Section D and E.

New Algorithms

The Contact Assessment has two new algorithms, visible under the 'Outcomes tab'.

Self-Reliance Index (SRI) is referenced in the interRAI Contact Assessment (CA) Assessment Form and User's Manual, as part of the algorithm required for calculating Assessment Urgency, Service Urgency and Rehabilitation urgency. Now, users can view the Self-Reliance Index as a stand-alone scale to further explain these algorithms.

MDS items CA assessment	Description
C1	Daily Decision Making
C2a	Bathing - performance
C2b	Personal Hygiene - performance
C2c	Dressing lower body – performance
C2d	Mobility - performance
Score	Description
0	Self-Reliant
1	Not Self-Reliant

The Pain Scale has also been added to the Contact Assessment. It triggers in the same way as it does for other instruments.

MDS items CA assessment	Description
D9a	Pain Frequency
D9b	Pain Intensity
Score	Description
0	No Pain
1	Less Than Daily Pain
2	Daily Pain but Not Severe
3	Daily Severe Pain
4	Daily Excruciating Pain

These are visible using the Outcomes tab. They do not display in the body of Section E of the assessment, with the other algorithms.

Outcome Scales Trends			
Return Most Recent Prev Next			
Assessment: DRAFT: Contact Assessment + COVID-19 Vulnerability Screener version		Reference Date: 28/10/2020	
Outcome Scales			
	Assessment Urgency (1-6)	4 - 1 meaning least urgent to 6 for the most urgent.	1  6
	Pain Scale (0-4)	1 = Less Than Daily Pain	0  4
	Rehabilitation Algorithm (1-5)	5 - 1 meaning least urgent to 5 for the most urgent.	1  5
	Self-Reliance Index (0-1)	1 - Not Self Reliant.	0  1
	Service Urgency Algorithm (1-4)	1 - 1 meaning least urgent to 4 most urgent	1  4
