

Older people assessed by interRAI, Midland Region, July to September 2018

One of the ways DHBs help older people get the right support at the right time, is to have a health professional complete an assessment of their health and wellbeing. This assessment is known as an interRAI Home Care assessment.

The information in this infographic is from interRAI Home Care assessments for people living at home in the community.

We publish the interRAI Home Care assessment results to encourage health professionals, community groups, and family/whanau to check in with older people and see how they are doing.

Notes:

2,410 interRAI Home Care assessments were completed.

**This is based on a moderate to high score on the CHESS Scale (Changes in Health: end stage disease signs and symptoms).*
