

Older people assessed by interRAI National

April to June 2018

Non-Māori

Māori

One of the ways DHBs help older people get the right support at the right time, is to have a health professional complete an assessment of a person's health and wellbeing. This assessment is known as an interRAI assessment.

The information in this infographic is from interRAI Home Care assessments for people living at home in the community.

We publish the interRAI Home Care assessment results to encourage health professionals, community groups and family/whānau to check in with older people and see how they are doing.

Notes: 9,210 interRAI Home Care assessments were completed. Of those aged 65 plus, 6% identified themselves as Māori and 94% identified as non-Māori. The census data shows 6% of the population aged 65 plus identify as Māori.
