

Changing or adding security questions in Momentum

Security questions are used to complete a password self-reset, and to verify your identity when calling the interRAI Software Help Desk. Security questions can be changed by going to the User Preferences menu. This menu is found on the Client Search or Resident Search screens.

All your answers must be six or more characters.

Your new security question selection has been saved to your account.

Any questions?

If you have any questions, please contact interRAI@tas.health.nz
