Help with changes since the interRAI software upgrade

The last interRAI software upgrade came with a number of functionality changes, for example new ways of assigning GPs and entering ethnicity. We have developed guidance for these changes available on our website at www.interRAI.co.nz/news/software-upgrade

Competency evaluations moving to a new platform

The interRAI competency evaluations are moving to a new platform, Relias, on 18/19 December 2018.

What you need to know about the move to Relias

- The evaluations system will be **unavailable** on 19 December 2018 – one day only.
- We will be in touch by email with all assessors whose evaluations are due around that date. You will need to have your evaluations **completed before moving day**.

- The new site **looks and feels different**. Guidance will be on the interRAI website.

After moving day:

- **Reminder** emails will come from Relias.
- When you **first login** to Relias, you will need to use your AIS user name and a password we will give you. You will be prompted to change this password at first login. You do not need to login until your evaluations are due.
- Email us at interRAI@tas.health.nz for evaluations support.

Five assessments needed for competency

We have aligned the interRAI competency standards for better consistency. Assessors will now need a minimum of five assessments for each assessment instrument, or five Home Care and three Contact assessments in a combined course.

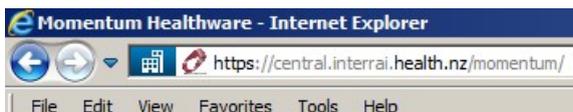

At least five assessments are now needed for each of these competencies:

- LTCF assessment
- Home Care assessment
- Contact assessment
- Community Health assessment.

IE11 Enterprise Mode not compatible with interRAI

Users of Internet Explorer 11 cannot use interRAI in Enterprise mode.

You can tell you are using Enterprise mode when you see a blue buildings icon on the left of the address bar in IE11.

Contact your IT support to exclude the interRAI websites from the Enterprise Mode compatibility list. Your interRAI Service Desk is also able to assist.
