

Accessing interRAI

Minimum Hardware Requirements

Standard Workstation

These minimum recommendations are for a standard client to install the Momentum Healthware software (for Check-in and Check-out (CICO)) and to access the software through the World Wide Web page.

For those workstations that will always be connected to the central server, the minimum recommendations are those minimally required to run Microsoft Edge, Chrome or Firefox.

Hardware requirements

Item	Requirements	Notes
Processors	<ul style="list-style-type: none"> Workstation class Dual Core Processors - Intel or AMD - 2.0 GHz or better 	
RAM	<ul style="list-style-type: none"> 4 GB 	We recommend that your workstation be scale-able to increase RAM if needed
Video	<ul style="list-style-type: none"> Widescreen 1366 x 768 or 1920 x 1080 or better. 	Using Microsoft recommended Scale and Layout Setting. Smaller resolutions may work depending upon scaling and browser zoom setting.

Software requirements

Item	Requirements	Notes
Operating Systems	<ul style="list-style-type: none"> Windows 7 or Windows 10* 	
Other Software	<ul style="list-style-type: none"> Microsoft Edge, Chrome, Firefox Adobe Reader 10 or greater 	

***Note:** Ensure all latest service packs and updates are implemented.

Tablets

Momentum Healthware supports the use of the following tablets while network connected:

- Android (i.e. Samsung and Google Nexus) 10"+ tablets accessing the solution while network connected running the most recent version of the Android Chrome browser.

- Apple iPad 10"+ tablets running most recent version of O/S using Safari browser.
- Microsoft tablets 10"+ accessing the solution while network connected running Microsoft Edge, Chrome or Firefox.

Note:

The Momentum Data Analysis module is not supported on Android or Apple tablets. Local installation of the Convergence application for mobile use is not supported on Android or Apple tablets

Mobile Workstation

Hardware requirements

These minimum recommendations are for a typical laptop able to check records out for disconnected/offline use. We recommend higher CPU speeds and more memory for better performance, although the application is quite acceptable at these specifications.

Item	Requirements	Notes
Processors	Workstation class Dual Core Processors - Intel or AMD - 2.0 GHz or better	64 bit recommended
RAM	4GB	Ideally 8GB. We recommend that your workstation be scaled to increase RAM if needed
Hard drive	2GB available	
Video	Widescreen 1366 x 768 or 1920 x 1080 or better.	Using Microsoft recommended Scale and Layout Setting. Smaller resolutions may work depending upon scaling and browser zoom setting.

Software requirements

These minimum recommendations are for a typical client/server install for a laptop that is capable of checking records out for disconnected use.

Item	Requirements	Notes
Operating Systems	Windows 10 Pro and Enterprise editions.	64 bit recommended Home Editions not supported
Other Software	<ul style="list-style-type: none">• Microsoft Edge, Chrome, Firefox• SQL Server 2014, 2016, 2017, 2019 Express Edition with Advanced Services.• IIS (comes with Windows)• Microsoft .Net framework version 4.8	Edge version 80+

Note: Ensure all latest service packs and updates are implemented.

Tablets

Momentum Convergence supports the use of the following tablets for mobile:

- Microsoft tablets that run Windows 10 (not “RT” version).

Note: Local installation of the Convergence application for mobile use is not supported on Android or Apple tablets.
