

Device Requirements

The purpose of this document is to provide the minimum device requirements to access the Momentum software through the web-based application or install Momentum Mobile for working offline using the Check-in Check-out (CICO) function.

1. Standard Workstation for Web Based Access

For those workstations that will always be connected to the central server, the minimum recommendations are those required to run Microsoft Edge, Chrome, or Firefox.

1.1 Hardware requirements

Item	Requirements	Notes
Processors	Workstation class Dual Core Processors - Intel or AMD - 2.0 GHz or better	
RAM	4 GB	We recommend that your workstation be scalable to increase RAM if needed
Video	Widescreen 1366 x 768 or 1920 x 1080 or better	Using Microsoft recommended scale and layout settings. Smaller resolutions may work depending upon scaling and browser zoom setting.

1.2 Software requirements

Item	Requirements	Notes
Operating Systems	Windows 7 or Windows 10*	Must be able to run Microsoft Edge, Chrome, or Firefox
Other Software	<ul style="list-style-type: none"> • Microsoft Edge, Chrome, Firefox • Adobe Reader 10 or greater 	

***Note:** Ensure all latest service packs and updates are implemented.

1.3 Tablets

Momentum Healthware supports the use of the following tablets while network connected:

- Android (i.e., Samsung and Google Nexus) 10"+ tablets accessing the solution while network connected running the most recent version of the Android Chrome browser.
- Apple iPad 10"+ tablets running most recent version of O/S using Safari browser.
- Microsoft tablets 10"+ accessing the solution while network connected running Microsoft Edge, Chrome, or Firefox.

Note: The Momentum Data Analysis module is not supported on Android or Apple tablets. Local installation of the Convergence application for mobile use is not supported on Android or Apple tablets.

2. Mobile Workstation for Check-in-Check-out (CICO)

These minimum recommendations are for a typical laptop able to run the Momentum Mobile software and check records out for disconnected/offline use. We recommend higher CPU speeds and more memory for better performance, although the application is quite acceptable at these specifications.

2.1 Hardware requirements

Item	Requirements	Notes
Processors	Workstation class Dual Core Processors - Intel or AMD - 2.0 GHz or better	64-bit recommended
RAM	8GB	We recommend that your workstation be scalable to increase RAM if needed
Hard drive	4GB available	
Video	Widescreen 1366 x 768 or 1920 x 1080 or better	Using Microsoft recommended scale and layout settings. Smaller resolutions may work depending upon scaling and browser zoom setting.

2.2 Software Requirements

These minimum recommendations are for a typical client/server install for a laptop that is capable of checking records out for disconnected use.

Item	Requirements	Notes
Operating Systems	Windows 10 Pro and Enterprise editions	64-bit recommended Home Editions not supported
Other Software	<ul style="list-style-type: none">• Microsoft Edge, Chrome, Firefox• SQL Server 2014, 2016, 2017, 2019 Express Edition with Advanced Services• IIS (comes with Windows)• Microsoft .Net framework version 4.8	Edge version 80+

Note: Ensure all latest service packs and updates are implemented.

2.3 Tablets

Momentum Convergence supports the use of the following tablets for mobile:

- Microsoft tablets that run Windows 10 (not “RT” version).

Note: local installation of the Convergence application for mobile use is not supported on Android or Apple tablets.
